Used Redux tool kit and context for maintaining global state of the application.• Integrated User defined forms using reusable React components.• Integrated dynamic form where user can provide the form fields and validations i.e., data type, Min and Max length, email validations.• Integrated favorite windows where user can choose their favorite windows to have a quick view when they logged In.• Integrated role-based authentication and authorization where user can only View, Update, Add and Delete the windows(forms) based on the permissions granted• Given support to an existing website.• Added new payment flows and integrated re-usable components.
Role	React Web Developer
Environment	Web Application
Platform	React, Redux-middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful Web Services.

**Technical
Accomplishments**

- ☐ Given support to the existing website.
- ☐ Added new payment flows and integrated Re-usable components.
- ☐ Designed and Developed Screens with CRUDs Functionality.
- ☐ Created loads' of form with Redux-form library.
- ☐ Service Implementation and Integration of REST/JSON Services.

PROJECT: 2

Project Name	NCUK
Company	IMPELSYS
Status	Live
Description	<ul style="list-style-type: none">• NCUK provides end to end services for the Education Sector• NCUK is unique in higher education. NCUK is a consortium of leading universities dedicated to giving international students guaranteed entry to universities worldwide and helping them succeed when they get there. Our main office is located in Manchester, UK with other key staff members being located in China and the wider Asia region.
Responsibilities	<ul style="list-style-type: none">• Worked on React Query to Integrating the REST APIs as per the business requirement. Used Redux tool kit and context for maintaining global state of the application.• Worked on Calendar Management, Integrated User defined forms using reusable React components.• Developed the forms and worked on the Validations functionality• Worked on Dashboard & Dynamic Routes• Worked on Authorization and Authentication• Worked on Dynamic Forms
Role	React Web Developer
Environment	Web Application
Platform	React, Redux persist ,Redux-toolkit , PHP, SQL Database,Google Cloud, Visual Studio Code, Restful Web Services,Bit Bucket.
Technical Accomplishments	<ul style="list-style-type: none"><input type="checkbox"/> Given support to the existing website.<input type="checkbox"/> Integrated Re-usable components.<input type="checkbox"/> Designed and Developed Screens with CRUDs Functionality.

PROJECT: 3

Project Name	MY COVERAGE CARE
Company	US-based Company
Status	Live
Description	<ul style="list-style-type: none">• This Portal enables to provide the eligible insurance for the user based on the Income• My coverage care provides end to end services for the Health Insurance sector.
Responsibilities	<ul style="list-style-type: none">• Integrated REST APIs as per the business requirement. Used Redux tool kit and context for maintaining global state of the application.• Integrated User defined forms using reusable React components.• Developed the forms and worked on the Validations, functionality• Worked on the PA-Login page, Routes
Role	React Web Developer
Environment	Web Application
Platform	React, Redux-middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, Visual Studio Code, Restful Web Services.
Technical	<input type="checkbox"/> Given support to the existing website.
Accomplishments	<input type="checkbox"/> Integrated Re-usable components. <input type="checkbox"/> Designed and Developed Screens with CRUDs Functionality.

PROJECT: 4

Project Name	Campaign Manager
Company	US-based Company
Status	Live
Description	<ul style="list-style-type: none">• Campaign Manager is provides campaign services.• Campaign Manager Managing various services like Creating the templates which is used to communicate with clients
Responsibilities	<ul style="list-style-type: none">• Worked on Developing a web application to view the following modules: Campaign Maintenance, Template maintenance.• Integrated REST APIs as per the requirement. Used Redux tool kit and context for maintaining global state of the application.• Integrated User defined forms using reusable React components.• Integrated dynamic form where user can provide the form fields and validations.• Integrated re-usable components.
Role	React Web Developer
Environment	Web Application
Platform	React, Redux-middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful Web Services.
Technical Accomplishments	<ul style="list-style-type: none"><input type="checkbox"/> Integrated Re-usable components.<input type="checkbox"/> Designed and Developed Screens with CRUDs Functionality.<input type="checkbox"/> Service Implementation and Integration of REST/JSON Services.
