- ➢ NCUK is unique in UK higher education. It is a consortium of leading UK universities dedicated to giving international students guaranteed access to universities worldwide and help them to succeed.

- ➢ Features allow the students and university to maintain the data and Files for the admission process. It also includes the faculty role and different feedback form

 Responsibilities :
- ★ Understood existing application flow and recreated the application as per the new designs.
- ★ Implemented New user friendly UI designs.
- ★ Implemented reusable components.
- ★ Integrated REST/API services with help of react query.

Accomplishments :
- → Developed file management system where NCUK stores files and assets.
- → Integrated calendar management and event creator to the NCUK system can see and track the events with the help of React big calendar library.
- → Implemented user base dashboard and crop image bulk file upload Excel file data convert into table functionality.

PROJECT: 2

☑ **Galaxy**

Technologies: JavaScript, HTML5, CSS3, ReactJS, Formik, redux-toolkit, Class Components, React-router, Material-UI,
Role: ReactJS Developer.
Status: Live.
Company: US-based company.

Description :
- ➢ PDS Galaxy provides end-to-end services for the Health sector.
- ➢ Managing various services like Insurance Billing and follow-up, Early Out and patient Access, Bad Debt and collections, Accident Claims and workers' Compensation, and State and federal Health care Enrolment Assistance.

Responsibilities :
- ★ Developed a web application to view the following modules :
  Data Repository, Role Management, User Management, Core Windows and Custom Windows.
- ★ Integrated REST APIs as per the business requirement. Used Redux tool kit and context for maintaining a global state of the application.
- ★ Integrated User defined forms using reusable React components.
- ★ Integrated dynamic form where user can provide the form fields and validations i.e., data type, Min and Max length, email validations.
- ★ Integrated favorite windows where users can choose their favorite windows to have a quick view when they log In.
- ★ Integrated role-based authentication and authorization where users can only View, Update, Add, and Delete the windows(forms) based on the permissions granted.

Accomplishments :
- → Created loaders of form with Redux-form library.
- → Designed and Developed Screens with CRUD functionality.
- → Service Implementation and Integration of REST/JSON Services.

—--

PROJECT: 3
☑ SIC

Technologies: JavaScript, HTML5, CSS3, ReactJS, Formik, redux-toolkit, Class Components, React-router, Material-UI,Node.js
Role: ReactJS Developer.
Status: Live.
Company: US-based company.

Description :
- PDS-SIC is an Integrated Web solution for Secure Email.
- Sendit Certified is a Secure way of communication between individuals or businesses. It helps any individual or enterprise to communicate between them in a secure way which is different from any other email communication.

Responsibilities :
- Design, develop and test HTML5, CSS3, Bootstrap, Java Script and React.JS that meets accessibility and web browser standards for website.
- Worked on Sharing Files through using Decode and Encode routing.
- Used React-Router to turn application into **Single Page Application**
- Worked in using **React JS components, Forms, Events, Keys, Router and Redux concept**.

▪ **Used the Restful web service calls for POST, PUT, DELETE and GET methods.**

Accomplishments :
✓ Designed and Developed Screens with CRUDs Functionality.
✓ Created loads' of form with Redux-form library.

    Service Implementation and Integration of REST/JSON Services.
